

## Making flowers

You can cut your handprints out of coloured paper if you have any. If not use white paper and decorate your handprint with pens, pencils or crayons.

If you have paints, you can paint your handprint, making single flowers or bunches of flowers. If you want to have really colourful flowers you could paint each finger a different colour and make a rainbow flower.

If you want to be creative you can print flowers using your fingerprints.

Whichever way you choose to make your flowers, have fun.
